Living or Leaving?
Towards a socially sustainable design for postwar housing blocks.
The case of Simonsterrein in Feijenoord, Rotterdam

PROJECT DESCRIPTION

The project aims to enhance the housing complex’s connection with the neighborhood, through the participation of its users and the optimization of its urban context. The intervention involves the reuse of the existing buildings and the introduction of new structures to create a mixed-use community. The design focuses on the promotion of social sustainability and the enhancement of the urban environment. The project’s goals include the creation of a more inclusive and vibrant living space, while maintaining the existing infrastructure.
