1. IMPROVING COLLECTIVE

The social fabric of Molièrebuurt needs to be further strengthened. The focus is on sustainable use and possible solutions to improve the social cohesion, maintenance and safety. The current facades haveBLEV handicap accessibility. The social cohesion needs to be improved by creating collective spaces and facilitating social interaction. The design focuses on the visibility and horizontal orientation of the facades. The generic solutions that were developed for both the individual and collective space are as follows:

- Make a visible buffer zone between the porch and the parking spaces.
- Create a community deck from the parking spaces into the building.
- Make the building readable territories.
- Make the entrance windows open.
- Remove unnecessary windows.
- Create a buffer zone from the parking spaces into the buildings.
- Make the entrance windows readable.
- Allocate green territories.
- Make the entrance area visible.
- Remove unnecessary windows.
- Make the entrance windows open.

Each solution was translated into working on the influence on the different stated problems, such as social, functional, and architectural. The results of the experiment are as follows:

- The generic solutions that were developed for the individual space have been applied in the individual apartments and by the individual owners.
- The generic solutions that were developed for the collective space have been applied in the collective space.
- The impact of the solutions has been assessed and the results are as follows:
- 1. safety: The safety of the spaces has been improved.
- 2. responsibility: The responsibility of the owners has been improved.
- 3. maintenance: The maintenance of the buildings has been improved.
- 4. security: The security of the spaces has been improved.
- 5. accessibility: The accessibility of the spaces has been improved.
- 6. expression: The expression of the buildings has been improved.
- 7. spatial quality: The spatial quality of the buildings has been improved.

The solutions have been evaluated by the owners and the results are as follows:

- The solutions have been improved by the owners.
- The solutions have been improved by the residents.
- The solutions have been improved by the neighbors.
- The solutions have been improved by the city.

The solutions have been improved by the city.

The solutions have been improved by the city.
